As to claim 4, the prior art of record fails to teach or suggest a method of driving a plasma display panel, comprising: *setting a number of sustaining pulses in response to an average picture level*; and *setting a period of each sustaining pulse in proportion to the average picture level, the period of the sustaining pulse being obtained by increasing a duration of the low width of the sustaining pulse in proportion to the average picture level and maintaining a duration of the high width of the sustaining pulse*, as claimed.

As to claim 12, the prior art of record fails to teach or suggest a method of driving a plasma display panel, comprising: *setting a number of sustaining pulses in response to an average picture level*; and *setting a high width of the sustaining pulse in proportion to the average picture level and maintaining a duration of the low width of the sustaining pulse*, as claimed.

As to claim 14, the prior art of record fails to teach or suggest a method of driving a plasma display panel, comprising: *setting a number of sustaining pulses in response to an average picture level*; and *setting a low width of the sustaining pulse in proportion to the average picture level and maintaining a duration of the high width of the sustaining pulse*, as claimed.

As to claim 16, the prior art of record fails to teach or suggest a driving apparatus for a plasma display panel, comprising: *average picture level means for setting an average picture level corresponding to a video data*; and *period setting means for setting a period of a sustaining pulse in such a manner to be in proportion to the average picture level set by the average picture level means, the period of the sustaining pulse being obtained by increasing a duration of the high width of the*
